Project Name	Calculating Family Expenses using ServiceNow
Maximum Marks	2 Marks

### Customer Problem Statement

A homemaker or working parent often faces the challenge of managing and tracking household expenses manually. This process is time-consuming, error-prone, and lacks structure, making it difficult to monitor spending patterns or identify areas for savings.

The goal is to simplify, automate, and organize the entire process of recording and calculating family expenses.

### Problem Statements (PS)

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A homemaker managing family expenses	Keep track of all daily expenses	It takes too much time and effort manually	There's no simple system to calculate and record automatically	Frustrated and stressed about unorganized finances
PS-2	A working parent managing household income	Analyze monthly spending and savings	The data is scattered across notes and receipts	I have to calculate totals by hand every month	Confused, tired, and unsure about actual expenses
